

Derian André Castillo Franco

Senior AI Fullstack Engineer

Architecture, AI engineering infrastructure and frontend with a designer's eye for UX/UI.

Querétaro, México (UTC-6) / +52 (33) 1278-1411 / derianandre.com / hola@derianandre.com / [LinkedIn](#) / [GitHub](#)

AI engineer who works from first principles, a habit from nanotechnology engineering. I orchestrate AI agents and generative workflows to deliver with a researcher's depth and an architect's precision; as engineering lead of a fintech platform, I took the team to 85% verifiable AI-assisted commits with 90.7% API test coverage.

Skills

AI	Claude, Claude Code, MCP connectors, agentic workflows, custom agent harnesses (skills, agents, rules), prompt engineering
Frontend	JavaScript TypeScript React Next Vue Nuxt Angular Jest jQuery HTML5 CSS3 SASS
Backend	Node Express Nest TypeORM Prisma SQL MongoDB Mongoose REST GraphQL WebSockets Python
Cloud	AWS (ECS Fargate, IAM) GitHub Actions CASL Veracode SonarQube
Design	Illustrator Photoshop Figma
Teamwork	Git GitHub GitLab Azure DevOps Bitbucket Jira Confluence Slack Trello
Language	English (EF SET C2 Proficient) Spanish (Native)

Experience

PwC México – Senior Fullstack AI Software Engineer Remote 2023 March – Present

- Technical lead of an international team delivering a fullstack Oracle project.
- Owned code quality across frontend and backend services: resolved Veracode and SonarQube findings and became a Veracode Level 3 Verified Continuous Security Champion.

Freelance / Contract – Engineering Lead, AI Engineer & Designer Remote 2015 August – Present

- Engineering Lead of a production fintech platform (Sûl Finance) with a team of five: 228 API endpoints, 90.7% API test coverage behind CI gates, and a release every 4.6 days (DORA Elite).
- Built the team's AI engineering infrastructure (327 skill, agent and rule files), reaching 85% verifiable AI-assisted commits; led the migration to AWS ECS Fargate and the AuthZ rewrite with CASL.
- Engineering lead for a crypto wallet (EnXingaPay), and agentic automations on Claude with MCP connectors for SMB clients.
- Full-stack delivery from design to launch for startups and national and international companies since 2015.

BlueOptima – Frontend Software Engineer Hybrid 2022 May – 2023 January

- Took features from analysis and documentation to production with no major bugs, on accurate estimates.
- Resolved production-breaking bugs, prevented critical regressions and supported client-specific issues on a legacy Angular codebase.

Inbright & Xolvex – Frontend Software Engineer Remote 2018 November – 2022 May

- Led a cross-functional team designing and implementing the frontend architecture behind several product launches.
- Managed analysis and task delegation, delivering on time and within budget.

Education

Nanotechnology Engineering 2013 August – 2018 December

Instituto Tecnológico y de Estudios Superiores de Occidente

- Managed a nanotechnology laboratory (SEM, XPS, AFM, sputtering) and used Python and ORCA to simulate molecular systems.
